DETAILED ACTION

Applicant's election without traverse of claims 1-7 and 11-24 in the reply filed on 9/4/07 is acknowledged.

The requirement is still deemed proper and is therefore made FINAL. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claims 8-10 and 25-81 are hereby withdrawn from further consideration.

Claim Rejections - 35 USC § 103

Claims 1-7 and 11-24 rejected under 35 U.S.C. 103(a) as being unpatentable over the applicant's background, and further in view of Boarman et al, USP 6,609,112.

As per claims 1, 11 and 18, the applicant's background discloses a method/computer system/machine readable medium of conducting an auction for an item, comprising the steps of: setting a current asking price for the item; posting the current asking price and enabling bidding at the current asking price; periodically decreasing and posting the current asking price until a first bid is received from a first bidder at the then current asking price, and awarding the item to the first bidder at the then current asking price. The applicant's background does not disclose, after the first bid is received, at least one additional bidder bids higher than the first bid within a predetermined time interval after the first bid is received. Boarman discloses after the first bid is received, at least one additional bidder bids higher than the first bid within a predetermined time interval after the first bid is received (col.4, 29-67; col.5, 1-61; fig.4 and abstract). It would have been obvious to modify the applicant's background to

include after the first bid is received, at least one additional bidder bids higher than the first bid within a predetermined time interval after the first bid is received as that taught by Boorman in order to conduct proxy bidding within the context of Dutch auctions (col.1, 60-63).

As per claims 2, 12 and 19, the applicant's background further discloses setting a reserve price for the item, the reserve price being that price below which the item will not be sold, and stopping the auction if the periodic decreasing step decreases the current asking price to a level that is at or below the reserve price and no bid is received at the reserve price.

As per claims 3, 13 and 20, the applicant's background further discloses wherein the decreasing step is carried out at a predetermined regular time interval.

As per claims 4, 14 and 21, the applicant's background further discloses wherein the posting step includes a step of causing the current asking price to be displayed on at least one remote computing device coupled to a network.

As per claims 5, 15 and 22, the applicant's background further discloses wherein when the at least one additional bidder bids higher than the first bid, the method further comprises the steps of: accepting increasingly higher successive bids from at least one of the first bidder and the at least one additional bidder, and awarding the item to a highest bidder among the first bidder and the at least one additional bidder.

As per claims 6, 16 and 23, the applicant's background further discloses wherein the accepting step accepts each one of the increasingly higher successive bids if timely received.

As per claims 7, 17 and 24, the applicant's background further discloses wherein the item includes at least one of a contract, goods, a service, real estate and a legal right.
